Automation - Lift / Elevator - Handling system - Atex and IECEx

Since 1952 designing the Future

ABOUT US

Founded in Italy in 1952, Giovenzana has gradually consolidated its experience in the field of safety components for industrial technologies. In the '70s it began its **internationalization** process opening to new European and international markets. The progressive expansion throughout the world has been combined with a growing diversification of its product range linked to the search for new business sectors. With 68 years of experience, Giovenzana has focused its strategy on the creation of innovative and reliable products able to anticipate market needs.

MISSION

Quality and competence guide Giovenzana in the development of real **safety solutions** for the different needs of the market. Today its **high quality** products are recognized all over the world. Giovenzana strongly focuses on **environmental sustainability** and **energy efficiency**. The company mission is safety first of all. Know-how and experience are the solid basis for the design of safety devices that are reliable, ergonomic and intuitive. The goal is to anticipate the different needs of the markets becoming a reference point for its customers so that a constant and direct connection between the sales network and the customers is generated.

MARKETING

Giovenzana sells to 75 countries and develops components in full compliance with **European and international standards**. Giovenzana exports all over the world and manages its customers through a competent and available **global sales network**. The relationship with customers is facilitated by a structured back office and the presence of a renewed website that guides the customer in the conscious choice of the right product.

INNOVATION

Development, design and production combine together to achieve a common goal. **Giovenzana products are the result of innovation, experience and daily application of its technological knowledge**. Over the years the company has developed new solutions improving its skills, thus increasing the safety of its products.

QUALITY AND ENVIRONMENTAL POLICY

The attention to product quality, the search for excellence aimed at innovation and the continuous development of new projects by the Research and Development department are our daily commitment. All our commercial and industrial activities have been included in the quality system **UNI EN ISO 9001:2015** (Certificate CSQ N 9105. GIOV.). The quality system for the end user is the guarantee that the production phases are effectively under control, comply with the company's requirements as required by the customer and comply with the most relevant international standards. With the **UNI EN ISO 14001:2015** standard (Certificate CSQ N 9191. GIBV.), Giovenzana uses new technologies that limit the use of raw materials, energy and natural resources to minimize waste and emissions, protecting the environment. All products are of certified quality and follow the guidelines of Rohs, Pfos, Raee and Reach.

PRODUCTION

The solutions offered by Giovenzana derive from a wide knowledge of the needs of industrial electrical devices and are in line with the major international industry standards. Since 1952 Giovenzana has been creating, designing and implementing security solutions to meet the needs of its customers within its business areas:

- **Handling system;**
- **Industrial automation;**
- **Lift technology and escalators;**
- **Atex and IECEx equipment.**

PRODUCTION AND LOGISTIC UNITS

Giovenzana International B.V. has **four production plants**: the historical one in Italy, two in Hungary and the new one opened in Brasil.

Giovenzana, to support the market and its different needs, has created a **global organization** always in process to cover the territory in different logistic hubs.
